

The covered action is not exempt from CEQA, and includes applicable feasible mitigation measures identified in the Delta Plan's PEIR (which are also listed in the associated MMRP which can be found at <http://deltacouncil.ca.gov/final-programmatic-eir-0>).

The proposing agency shall explain, providing or using supporting documentation as appropriate (such as, for example, the proposing agency's MMRP for the covered action), whether each Delta Plan PEIR mitigation measure ("Delta PEIR MM") is:

- 1) Included as a mitigation requirement of the covered action as stated in the Delta Plan PEIR MMRP;
- 2) Included as a mitigation requirement of the covered action via a substitute mitigation measure(s) that the proposing agency has determined is/are equally or more effective;
- 3) Not applicable in the context of the specific covered action because the covered action has been determined not to cause a significant impact related to the Delta PEIR MM;
- 4) Not feasible in the context of the specific covered action; or
- 5) Is within the exclusive jurisdiction of an agency other than the proposing agency, and the proposing agency has exhausted all reasonable attempts to obtain concurrence of that other agency that would allow the proposing agency to cause the Delta PEIR MM to be implemented.
